

# Blugold Going Forward Plan

## Strategic Plan Alignment

- Increase collaborations across disciplines and colleges in support of health and wellbeing.
- Expand national partnerships to enhance opportunities for students, faculty and staff in health and wellbeing. Identify ways to enhance the wellbeing of faculty, staff, and students.
- Expand education pertaining to infectious disease and control practices.

## The TEAMS Strategy

### Testing

Maintain capacity and resources to perform testing	Expanded testing and awareness during times of higher risk
Continued efforts to make at-home tests available	Student Health Services to continue offering symptomatic testing options students

### Extra Precautions

Every-day sanitation methods and cleaning procedures	Ensure sanitizing stations are readily available and stocked
Inspecting air-handling units, utilizing air purifiers, and wastewater surveillance	Work-at-home options and employee accommodations when sick
Quarantine and isolation space capabilities	Communication with Public Health Departments and Department of Health Services

### Awareness

Campus-wide communication updates	Education about when or where to get tested
Education about masking	Community-minded messaging (be kind, understanding, respectful)
Wellbeing Committee support and guidance	Infectious disease resources on health equity

### Masks

Maintain inventory of masks and capability to distribute	N95/KN95 mask availability and free fit-testing service
Disposable mask availability throughout campus	Extra outreach during respiratory virus seasons

### Shots

Education about vaccine benefits and dispel misinformation	Dispel vaccine misinformation
Communication about when or where to get vaccinated	Work with Public Health Departments to conduct clinics during times of higher risk

## University of Wisconsin – Eau Claire commitment

We will continue our efforts to maximize the infectious disease controls, practices, and measures available on our campuses. Through collaboration of students and employees, we will continue to communicate important infectious disease information and updates. Working with Public Health Departments, we will continue to educate our campuses on safety and recommended protocols to help deter the effects of infectious diseases. We will be prepared to pivot and make the necessary decisions to help keep our campuses safe and healthy.
