An asset is a property the family owns that has an exchange value. The FAFSA collects current (as of the day of signing the FAFSA) data about cash, savings and checking accounts, investments, businesses, and investment farms. Most assets are investments, for example, college savings plans, Coverdell savings accounts, real estate, installment, and land sale contracts (including mortgages held), trust funds, mutual funds, money market funds, UGMA and UTMA accounts, certificates of deposit, stocks, stock options, bonds, commodities, and precious metals. If the asset isn't a business or investment farm, it should be reported as an investment.

Net Worth

The FAFSA asks for the net worth of investments, which is their total current market value minus their associated debts. If their net worth is negative, the student reports a zero. Similarly, the current net worth for businesses and investment farms is reported for land, buildings, machinery, equipment, livestock, and inventories. The current market value of a business or investment farm is reduced by the debt owed on it to determine its net worth. Business or farm debt means only those debts for which the business or farm was used as collateral.

Excluded assets—not to be reported on the FAFSA:

- Possessions such as a car, a stereo, clothes, or furniture are not reported as an asset.
- A family's principal place of residence is not reported, even if it is part of a business.
- A family farm (including equipment, livestock, etc.) isn't included as an investment on the FAFSA if:
 - it is the principal place of residence for the applicant and his family (spouse or, for dependent students, parents), and
 - the applicant (or parents of a dependent student) materially participated in the farming operation.
- Family-owned and controlled small businesses (which can include farms) that have 100 or fewer full-time or full-time equivalent employees do not count as an asset. "Family-owned and controlled" means that more than 50% of the business is owned by persons who are directly related or are or were related by marriage (family members do not have to be counted in the household size for this question).
- Retirement plans and whole life insurance. The value of retirement plans (401[k] plans, pension funds, annuities, non-education IRAs, Keogh plans, etc.) is not counted as an asset, but distributions do count as income—they appear in the AGI if taxable and in question 89 if untaxed. Similarly, the cash value or equity of a whole life insurance policy isn't reported as an asset, but an insurance settlement does count as income.
